

# Van Gorp

## Description

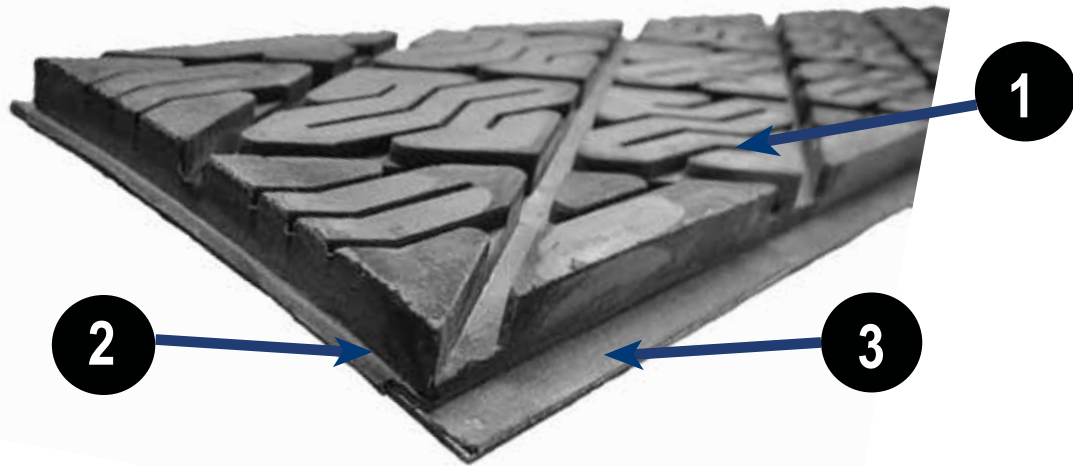

Van Gorp's Field Lag significantly improves the efficiency of the conveyor and/or elevator. The Field lag is designed to improve belt system performance with low maintenance operation.

## Benefits of Field Lag

- **Adjustable Steel Backing:** The slots in the steel backing allows the Field Lag pad the ability to be formed in the field to fit the diameter of most pulleys.
- **Reduced Inventory:** The Field Lag's ability to be formed in the field saves the customer from buying different pads for multiple diameters.
- **Durable:** The Field Lag is made up of elastomer compounds giving it the ability to withstand severe environmental conditions.
- Lower Maintenance
- Reduced Downtime
- Self Cleaning Ability
- Improved Traction

*World Class Quality*

- 1-Exclusive Elastomer
- 2-Factory Hot-Vulcanization
- 3-Steel Backing Plates

Field lag's Exclusive Elastomer is Static Conductive, Oil Resistant and Flame-Retardant
